

THE BUSINESS AGILITY PLATFORM

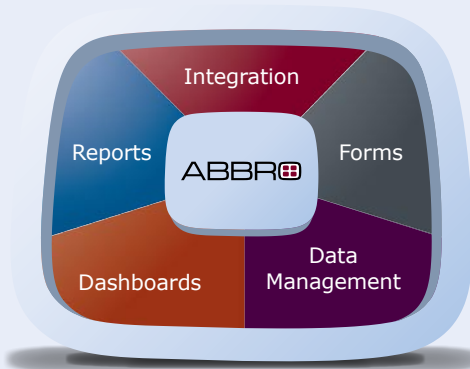

What is abbro

Abbro is a powerful business system development platform that enables the rapid deployment of fully-functional applications aligned to your exact business requirements. The platform has been developed over 15 years and offers a unique breadth of capability and versatility to help businesses of all sizes improve their performance.

Benefits

- Respond quicker to customer needs, competitor initiatives and new legislation
- Eliminate the greatest barriers to business change: the difficulty, time, and cost of adapting systems to support new processes
- Support business development and process improvement
- Support regulatory demands (such as Sarbanes Oxley)

FEATURES

Dashboards

- Simple graphical reports show real-time business activity direct on the desktop
- One screen shows current performance across many business areas
- Sophisticated tools allow managers to drill-down for further information

Forms

- Design, complete, print, fax and email electronic forms
- Generate ad-hoc reports from data gathered using forms
- Use bar code and OCR scanning to complete your forms

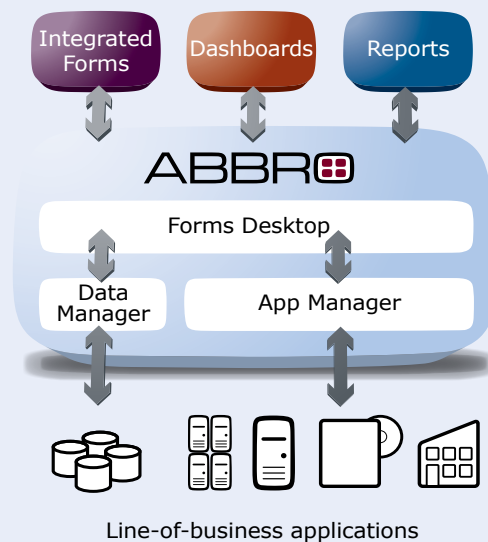

Data Management

Abbro interrogates, cleans and manages data to provide a consistent view of the customer

Reports

- Create reports consolidating data from multiple business systems in real time
- Data can be gathered from transactional systems, data warehouses or end-user programs like Access and Excel

Integration

- Align, consolidate and merge existing systems
- Replace or integrate systems with new applications
- Create new applications to leverage current data
